INTRA\One!

COMPREHENSIVE INSPECTION OF PLASTIC PACKAGING

Designed as a single-camera-system, the IntraOne!® combines the advantages of a smart camera solution with the well-established IntraVision software. It can be used for the quality control of closures, bottles, containers as well as labels and decoration.

FIND OUT MORE.

The entire IntraOne!® equipment including the basic package and additional options

IntraOne!® can easily be integrated into any production line. Its design allows for use even in the most demanding environments. IntraOne!® uses an integrated industrial PC and is therefore particularly space-saving. The system can be installed quickly and effortlessly. Together with you and on-site, our experienced service technicians will find the ideal configuration for your inspection task.

VERSATILE CAPABILITIES

IntraOne!® is based on INTRAVIS' longtime experience and expertise in quality control of closures, bottles, containers as well as labels and decorations. The **well-known IntraVision software** is installed on the camera enabling use of all proven inspection modules.

The system inspects for typical defects such as contamination, color or contour deviation or even any type of damages with **inspection speeds of up to 50 objects / second**.
