Business Challenges

Inefficient vehicle use

Lack of driver discipline

Lack or absence of unit-related info

What Navmii Tracker offers:

Real-time vehicle tracking is the ultimate solution
to boost fleet efficiency.
With Navmii Tracker you can not only optimise your expenses but also improve driver discipline.
Our solution lets you know where, when, and what task your vehicles are working on.

- Control unit location on the map
- Monitor speed, location and other parameters
- Manage units remotely
- Get unit activity notifications
- Create geofences
- Track unit movements along a given route
- Obtain analytics in reports (tables, diagrams, statistics)

Powered by Navmii

A selection of companies we have worked with in the past.
