

CHAMP Cargosystems

Connected thinking
for the air cargo community

Corporate overview

All signs point to growth

Cargo management solutions

The **Cargospot suite** is highly interoperable, modular and scalable. Cargospot is adaptable, configurable and as Software as a Service.

Additional core services include Business Intelligence, ULD Management and Weight & balance, optimizing load planning for freighter operations.

A strong industry voice

CHAMP is an active participant within the air cargo community on IT issues bridging the gap between ideas, aspirations and practical implementation.

A clear customer focus

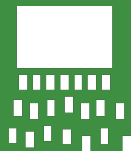

You can benefit in many ways from our connected thinking. Enjoy technological and functional enhancements offered as part of our continuous improvement process.

Connecting the community with innovative solutions

Customs and Security

Supporting 62 countries for electronic customs filing and security declarations.

Paper Free

CHAMP's solutions enable reliable electronic communication supporting the eAWB and eFreight industry initiatives.

Small and medium forwarders

CHAMP provides tools and services for SME forwarders to manage their shipments and connect electronically to carriers.

Portals

Enable customer self-service through data-capture and e-booking. Driving out costs and improving data quality.

Quality

CHAMP's CDMP measures performance and drive process improvements to support Cargo iQ certification.

Community integration platform

Our comprehensive eCargo Suite leverages the CHAMP portfolio seamlessly integrating with other CHAMP solutions. This level of integration provides our customers with a single source of solutions.

Connecting the community with innovative solutions

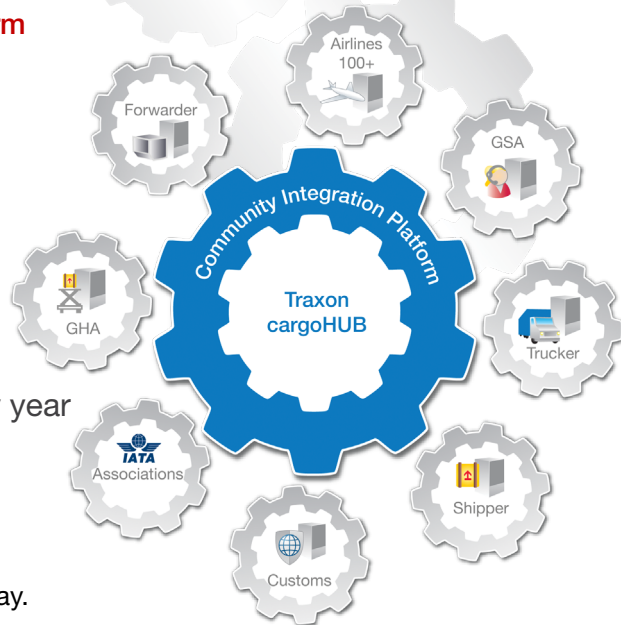

Community integration platform

We have been at the cutting edge of information exchange for over 30 years actively driving and supporting industry changes.

300M

Messages processed every year

Cargo IMP, Cargo XML, EDIFACT, custom formats – processed, converted and delivered every second of every day.

FREIGHT.AERO™

One site connecting to carriers who move up to 80% of the world's air cargo

Multi-carrier portal run by CHAMP that allows airlines to offer their customers a consistent way to access their cargo system. Expedite the flow of their shipments with online access that makes forwarders' work simple and with minimal re-keying. With FREIGHT.AERO you can:

- Check schedules
- Use tools to save keying
- Send air waybill details
- Make & update bookings
- Check availability
- Track shipments
