PRIMEUR DATA ONE®

DISCOVER YOUR NEXT
DATA INTEGRATION PLATFORM
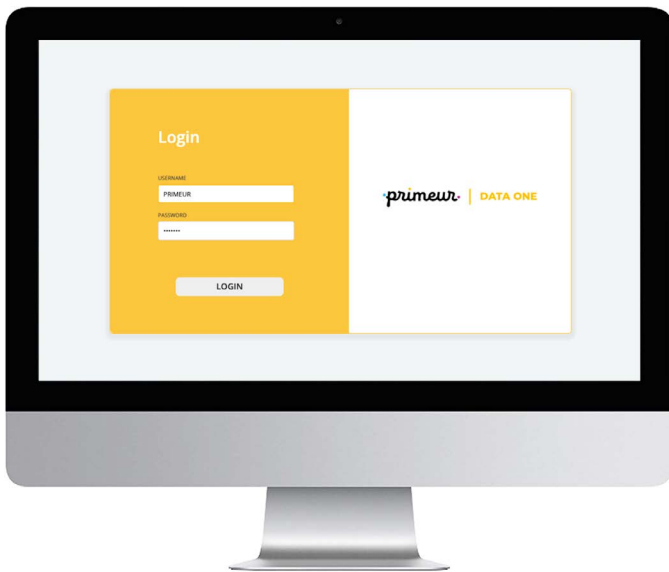

primeur | DATA ONE
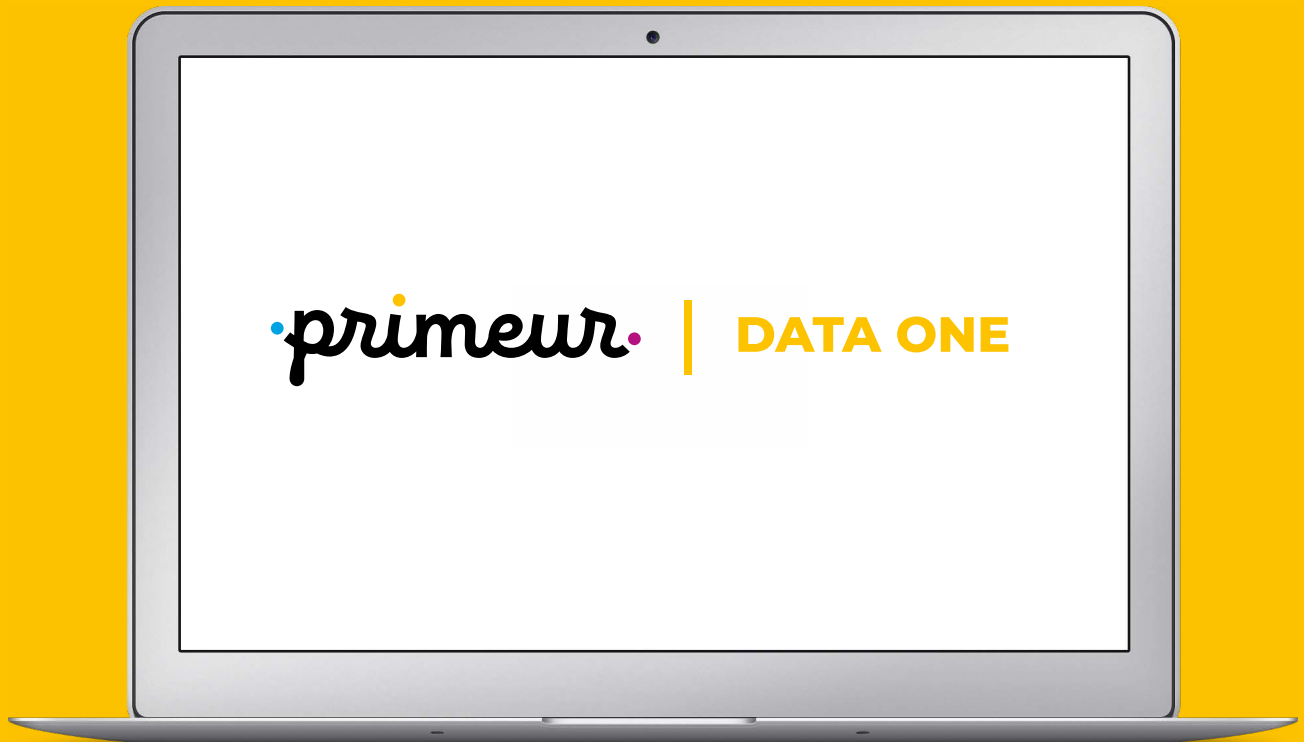

Any modern organization operates using different IT applications, such as CRM, ERP, billing apps, logistic apps, and so on. Many of these applications have been deployed over time, in different moments, for different needs and often from different providers. This fractioned evolution of the IT universe is normal in any organization that needs to answer mutating internal and external business requests. However, this phenomenon generates data silos (or data islands), making data communication between different applications and business data management problematic - sometimes even impossible - paralyzing or making operativity difficult, time-consuming and costly.

Smooth operativity needs total flexibility

To create a smooth operativity and full regulatory compliance, IT applications need to share data and information in a frictionless, automatic and controlled way. Such an effective way of working can be implemented only deploying the proper Data Integration strategy supported by the right integration tool. Especially today, when we are experiencing a continuously mutating scenario, flexibility has become the only real way to extend IT investments productive life and to ensure adaptability to the different business needs.

PRIMEUR DATA ONE®, built to follow your needs

PRIMEUR DATA ONE® is Primeur hybrid integration platform able to integrate third-party technologies, creating harmonic and secure dataflows.

Modular, flexible and scalable, PRIMEUR DATA ONE® is the result of more than 30 years of expertise integrating data for the most important Fortune 500 companies worldwide.

Completely based on the Contract Oriented Architecture® (COA®), a methodology fully developed and owned by Primeur, DATA ONE® allows users to easily model, plan, manage and control any Data Integration process end-to-end. It fosters cooperation between Business and Technical teams allowing to share a clear vision of integration requirements and to configure integration flows in a standard and consistent way.

Build your own platform

PRIMEUR DATA ONE® can be composed of four different modules, delivering an extremely friendly and intuitive user experience. Thanks to this modular approach, organizations can activate just the modules they need, to address their specific use cases, and tailor the platform according to their real needs.

Each module can be deployed as a PRIMEUR DATA ONE® component or as a lean standalone solution able to solve specific integration needs.

Four modules, endless capabilities

·primeur· | **DATA MOVER**

MFT module, it moves data securely across multiple protocols and multi-platform systems, owning the responsibility and control to deliver the file at the right time to the correct recipient.

·primeur· | **DATA SHAPER**

Data Transformation module, it provides quick and flexible any-to-any data transformations. It is designed to work perfectly with DATA MOVER® complementing and boosting its capabilities.

·primeur· | **DATA WATCHER**

Dataflow Monitoring module, it provides end-to-end visibility and control of any MFT dataflows, from source to destination, including possible transformations and third-party technologies.

·primeur· | **DATA PRIVACY**

GDPR readiness module, it accelerates Data Privacy law alignment with high automation, Interactive Maps, powerful Data Discovery, multi-language support and Data Masking.

Benefits

Acceleration of the integration process	Up to 50% less time
Cloud, distributed environments and Mainframes	Flexible deployment
Operative platform for all integrators	Effective cooperation between different roles
Easy clustering and true scalability	Better evolution and planning
Modern and intuitive user experience	Fast and collaborative partner on-boarding
Prior knowledge of how data moves	Quick isolation and anticipation of problems
Alignment with the highest security standards	Secure management of data traffic
Decoupling data producers and data consumers	Complete independence of applications
Event-driven architecture	Simple maintenance of integration processes
Asynchronous operations	Eliminate risks related to delivery time
Coordinate in-place integration tools	Preserve previous investments and know-how

About Primeur

We are a Smart Data Integration Company, with an unconventional philosophy. For more than 30 years we have been serving some of the most important Fortune 500 companies with our unconventional approach, our problem-solving attitude and our software solutions.

We make Data Integration simple, accessible, secure and sustainable over time.

Our goal is to help Companies to manage and control the data they generate, use and analyze without interfering with the existing IT systems and applications.

We help Companies to work better and smoother, preserving their existing systems and IT investments.

The results are better operations, driven by better and faster decisions, delivering a better service with a lower investment.

We Are Primeur.
